About me

I'm a passionate Computer Engineer with a great logical thinking. I look for smart solutions to every problem I face daily and I never say that something is impossible, I know of only few things that really are. I especially like the web and mobile application development and UI design. I'm currently working for, remotely most of the time, a South African company.

Work Experience

Systems analyst and senior developer

Dynatech

October 2012 - Present

Web application development and designing whose main aim is to innovate and bring South African government to the eGovernment. On the front-end, I have to master skills for technologies such as: GoogleWebToolkit, Javascript (jQuery) + AJAX + CSS (SASS). On the back-end we use TIBCO AMX-BPM and using, mainly, SOAP to integrate with it, we also use CMIS, Liferay (Portlets), Cordova (mobile app)... I'm also involved in helping the company with all the technical doubts they have in other areas.

Developer - Engineering Area

Novasoft

March 2010 - September 2012

I worked at "Platino", a project of interoperability for the Government of Canary Islands, Spain. Platino offers software as a service for the government. One of my best achievements was the automation of the deployment process for all the services offered. I also worked at development, implantation, resolution of incidences in critical projects, eGovernment and i+d+i analysis/development.

Education

Master of Computer Science and Engineering

University of La Laguna (2009-2011)

My final career project was a platform called "Turawet" based in three different tools to create online forms, download them in your mobile, to fill your data and analyze this geolocated data to extract more information depending on your business.

- Second best qualifications in 2011 Promotion

- 5th Prize contest "Conocer es valer" for the innovative project "Turawet" (FEULL).

Bachelor of Computer Science and Engineering

University of La Laguna (2006-2009)

I made and presented an optional final career project based in the web framework Django (Python) to manage a sports campus for children. In collaboration with the company [Galotecnica](#).

- Second best qualifications in 2009 Promotion

Courses

Android development (120 hours)

Universitat Politècnica de València (February 2013 - May 2013)

Oracle Administration (20 hours)

University of La Laguna (October 2011)

Workshop on Web Standards, by the W3C

University of La Laguna (November 2009)

English B2 Certificate

Official School of Languages of La Laguna (2004-2007)

Languages

- **Spanish:** Native
- **English:** Full professional proficiency (C1)

Skills and technologies

Java	jQuery	Bash
Javascript	Firefox OS	Jenkins
C/C++	Phonegap	Agile
Python	GWT	TIBCO AMX-BPM
Android	Django	Linux
HTML5	Alfresco	SQL
CSS/SASS	Liferay	

Additional Details

- Private tutoring C++ to bachelor's students
- Selected in a Firefox OS contest (October 2013)
